Email: **muphaw755@gmail.com**

Address: **Yangon,Myanmar.**

Skills

- HTML5, CSS3,TailwindCss ,Bootstrap, JavaScript (ES6+), TypeScript, React, Redux,Zustand, React query, Shadcn UI , Figma
- Basic understanding of build tools (Vite) and package managers (npm)
- Familiarity with RESTful APIs and AJAX/fetch for data fetching
- Version control with Git and GitHub
- Ability to follow design specs and UI/UX best practices
- Willingness to learn and adapt quickly

Work Experience

Intern | 2023 Jan - Feb

Frontiir -Myanmar Net

- Created system diagrams and architecture visualizations based on senior developers' projects in collaboration with the software architect.
- Collaborated with backend developers to integrate APIs and databases.
- Learned and applied Agile methodologies in team workflows.
- Helped with minor tasks in senior developers' projects.
- Good communication and teamwork skills

Projects

Medium Clone Blog Website | 2025 April - May

Personal Project

Technologies Used : **React, React query,Zustand, TypeScript,Shadcn UI,FireStore**

Built a full-featured blog platform where users can create, publish, and manage posts in categories like Technology and Business. The project focused on delivering a clean, user-friendly writing and reading experience similar to Medium.

Key Contributions/Features:

- Developed user authentication and role-based post management using Firebase Auth, enabling secure login and access control.
- Implemented post creation with rich text and image uploads, allowing users to format content and add visuals.
- Added search and category filters using Firestore queries, improving content discoverability and user navigation.
- Created responsive user profiles with editable bios and post lists for a personalized experience.

Productivity Suite (Pomodoro, To-Do, Notes, Budget Manager) | 2025 May - June

Technologies Used : **React, Typescript, Zustand, Tailwind CSS,Shadcn Ui WebSocket , Netlify**

Group Project

Collaborated on a comprehensive productivity web app combining Pomodoro timer, to-do lists, note-taking, and budget management to boost user efficiency. The frontend is hosted on Netlify, while backend APIs are hosted on Render cloud platform, ensuring reliable deployment and scalability.

Key Contributions/Features:

- Developed the Pomodoro timer frontend with customizable sessions and audio alerts, delivering a smooth user experience.
- Integrated frontend with backend APIs hosted on Render, using SockJS and STOMP WebSocket for real-time Pomodoro session syncing.
- Enabled multi-device updates and collaborative team timer modes through WebSocket communication.
- Managed API integration and deployment pipelines to ensure seamless connectivity between frontend and backend services.

Academic History

Myanmar Institute of Theology | **2023 - current**

Bachelor of Science in Computer Science

Certification

A to Z course - 2023

Programming Fundamentals - 2022

Ace Inspiration

CodeLab

UIUX Essential Course - 2024 Sep - Nov

MM Project
